

MUNSEONG JEONG

M: 0452462858
E: jmunseong@gmail.com
Carlton, VIC 3053

A fast learner and a passionate programmer with around 1.5 years of frontend experience. I am experienced in front-end development using numerous programming languages/tools including HTML, CSS, JS, React, NodeJS, Java, MySQL and Git. I enjoy learning new languages and development techniques. My communication and teamwork skills have improved a lot from previous working experience. I also adapt quickly to different working environments and I am a good team player that received many positive feedback from colleagues.

EXPERIENCE

Rider Operations

Oct 2019 - Present

EASI Australia Pty Ltd

Melbourne, Victoria, Australia

EASI Australia is running the most popular Asian food delivery platform in Australia. My responsibilities were:

- managed about 200 riders in Australia to help the platform to improve order capacity;
- helped riders to solve different issues they have during work;
- solved the conflicts and communication problems among merchants, riders and customers;
- improved communication and teamwork skills.

Online Store Manager

May 2015 - Sep 2017

DamingGlass

Pocheon, Gyeonggi-do, Korea

DamingGlass is a global trading company. The core business is the purchase, shipping, and sale of original glass sheets from China to Korea. My responsibilities were:

- developed online shopping platform from scratch based on WordPress and Cafe24 to enable customers to order products and track orders online, mainly used PHP, HTML, CSS and JavaScript;
- managed product information on different e-commerce platforms, such as Naver shopping, Gmarket and 11 street store, including creating images via Photoshop;
- translated documents between Chinese and Korean.

Web Designer

Jul 2013 - Apr 2014

샵피라 (Sappira)

Uijeongbu, Gyeonggi-do, Korea

Sappira is a company that designs, produces, and sells clothing for medical and entertainment companies in Korea. My responsibilities were:

- created and maintained promotion web pages, mainly used PHP, HTML, CSS and JavaScript;
- maintained product content across different online shopping platforms, including editing product information and creating photos via Photoshop;

Front-End Web Developer

Feb 2012 - Apr 2013

KISKorea

Seoul, Korea

Kiskorea provides an online international tourism platform and a mobile gaming platform. My responsibilities were:

- coded and maintained static web pages from the design, including both tourism and mobile gaming platforms' user interface pages and admin management pages, mainly based on HTML, CSS, JavaScript, jQuery and W2UI;
- implemented functionalities that get data from database, mainly based on Java and MySQL;
- tested, debugged and fixed errors in web applications.
